

Who we are?

AROMICS is a Barcelona-based company that specialises in the area of functional genomics and proteomics and their application in the discovery, preclinical, and clinical evaluation of new, effective and safer drugs.

Our mission

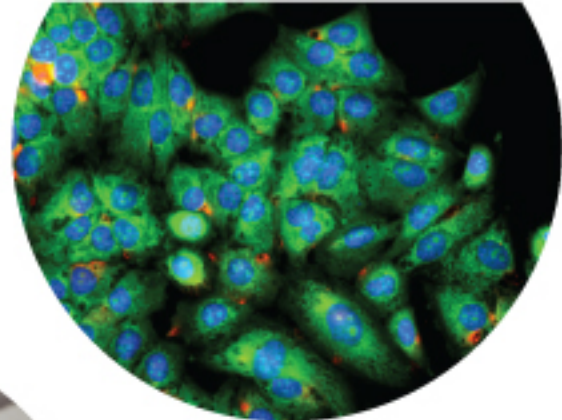

From early research to later-stage drug development, AROMICS addresses novel ways of greatly accelerating the R&D process by means of the integration of OMIC sciences in pharmaceutical development.

AROMICS aims to provide the market with novel drugs and molecular diagnostic products acting as a link between basic science and industry.

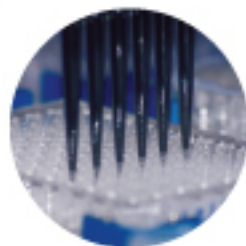

Our strategy

AROMICS' strategy focuses on:

- Predicting the efficacy, toxicity and safety profiles of drugs with greater accuracy
- Identifying new biomarkers and potential therapeutic targets
- Developing new diagnostic tools to predict and monitor drug response
- Promoting personalized medicine

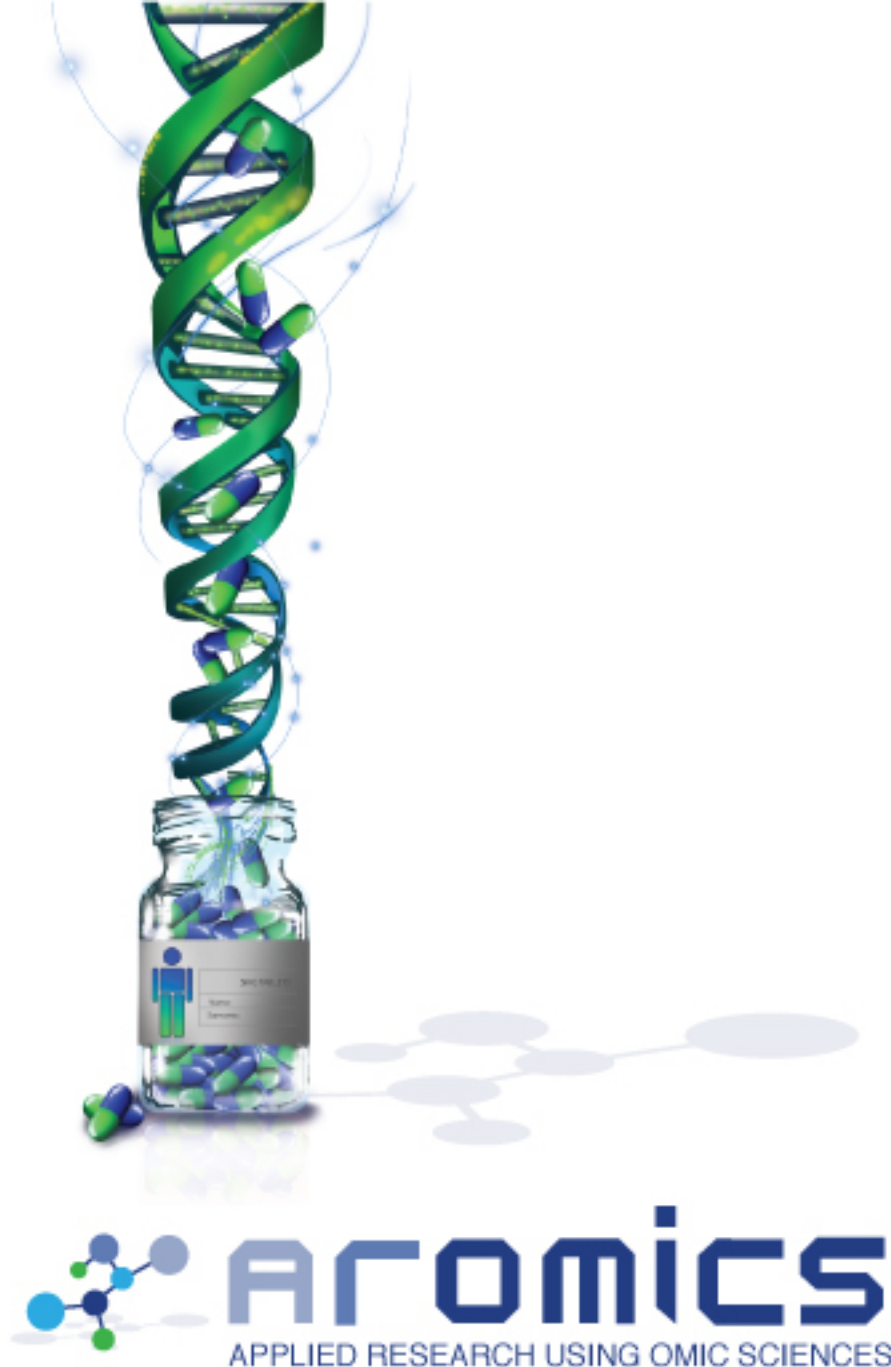

Filling the gap in drug discovery
...improving patients' treatment
...assuring quality of life

OUR ADDED VALUE

Aromics brings you...

- **Innovative products** (new drugs and diagnostic tools)
- **Dynamic solutions** (developing, implementing, and updating cutting-edge technologies and approaches)
- **Expertise** (highly skilled and experienced team)
- **Multidisciplinarity** (offering a broad range of relevant molecular and cell biology techniques)
- **Specialization** (applying functional genomics and proteomics in drug research and development)
- **Flexibility** (customer-oriented approach)

PRODUCTS PIPELINE*

Diagnostics

AROMICS partners relevant scientific, technological and industrial actors in R&D projects in the diagnostic field, focusing on the areas of health (human & animal), agro-food and environment.

INDICATION	PRODUCT	DESIGN	DEVELOPMENT	PROTOTYPE
INFECTIOUS DISEASES	Bugcheck			
	Immunolegio			
	Pathomilk			
	Cleanhive			
	Hilysens			
NEUROLOGICAL DISEASES	Tendercheck			
HORMONAL DISEASES	Ovultest			
DRUG SCREENING	Autoscreen			

Therapeutics

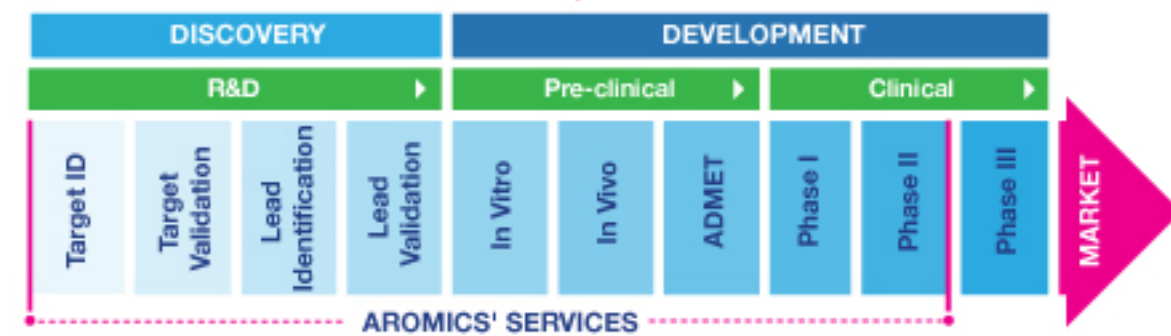

AROMICS is actively involved in both internal and collaborative R&D projects with pharmaceutical and biotech companies for developing new effective and safer drugs.

	PROJECT	DISCOVERY	SYNTHESIS	PRE-CLINICAL
		Market Identification	Market Validation	Early Late
INTERNAL	ARO-01 (Alzheimer)			
COOPERATION	SMART (Infectious diseases)			
	BERTA (Oncology)			

*Our R&D developments are partially financed through European Union, National, Regional and Private funding.

SERVICES PORTFOLIO

Our portfolio includes a comprehensive set of technological services which combine a broad range of relevant molecular and cell biology techniques. AROMICS offers customized experimental approaches to improve and build more effective and safer drug discovery pipelines.

AROMICS offers partnerships and services for the identification and development of biomarkers in the context of drug discovery and diagnosis.
